WELCOME TO SUP' LA MACHE / ISTL

ISTL, a part of Foundation La Mache, was founded in 1998.

It cooperates successfully with international universities and companies.

ISTL, **Institut Supérieur de Technologie de Lyon** offers a dynamic international programme designed to meet requirements of high education excellence. Its academic staff is skilled at teaching across cultures and languages. The programme provides students with skills/competencies and knowledge required in business and in industry in a global economy. Courses are entirely taught in English ; the ECTS sytem is applied both for the transfert and accumulation of credits. The academic year consists of 60 ECTS points and each semester consists of 30 ECTS points.

OUR MISSION

Since its beginning, our goals are to **offer and encourage mobility among students, teachers and staff through Erasmus+ programmes and inter institutional agreements**; to offer students a high level education, accurate professional training and to promote cultural awareness. By joining our programme, you have the opportunity to gain a valuable experience studying abroad and improve your foreign language and professional competencies.

ACCREDITATION

Our degree is accredited by the **French National Committee for Professional Certication (CNCP)** and recognized in the member States of the EU. It is connected with **European Qualication Framework (EQF)**. It meets quality of education and training programmes with the job market requirements.

BUSINESS CASE STUDIES

ITS - INTERNATIONAL TECHNICAL SALES with a German University.

During 2 weeks, ITS enables students to work in teams on multidisciplinary projects; to experience a professional situation, to develop their abilities to manage a company case. Students use their acquired competencies in the field of science engineering, business management by using new technologies as augmented Reality. They work in a multi-national environment in mixte teams from different nationalities. Students will develop their intercultural communication and teamwork skills. The language of instruction is English.

DTS - DATA TRAINING SYSTEMS

Real business case studies developed in an immersive training modules. During several weeks, DTS allow students to apply and acquire core competencies while improving teamwork and leadership skills in a realistic and fast-paced environment. Comparing with a traditional educational model, DTS promote a more independent and creative learning approach.
